

05 - MK Operational Release Hold

Status: operational-readiness template only. It records release holds and owners; it does not promote or expose runtime content.

Country pack: North Macedonia / Makedonia (MK)

This document records operational controls that must exist before a signed MK pack can be exposed. It does not promote runtime work and does not flip any feature flag.

Pack version/hash:

Release owner:

Date:

A. Required Operational Owners

Control	Named owner	Evidence path / system	Ready?
Content hotfix owner			yes / no
Emergency-number hotfix path			yes / no
Insurance/Green Card hotfix path			yes / no
Help Now alert owner			yes / no
Service-worker/cache alert owner			yes / no
Country-pack rollback/re-darken owner			yes / no
User-support escalation owner			yes / no

B. Release Holds

The MK pack remains dark if any answer is yes.

Hold condition	Yes/No	Notes
Any L2 sign-off row missing or blocked		
Any source older than accepted validity window		
Emergency number changed after signature		
Insurance / Green Card guidance uncertain		
Language certificate missing for shipped language		
Hotfix path untested		
Alert path untested		
Current authority/design gate not granted		

C. Validity And Hotfix Triggers

Pack valid until:

Maximum validity: 12 months unless counsel sets shorter period.

Out-of-cycle hotfix required when:

- emergency number or routing changes;
- police/EAS rule changes;
- Green Card, border-insurance, or foreign-plate practice changes;
- legal deadline or insurer process changes;
- language error could mislead a roadside user;
- Interdomestik support detects user confusion or incident-risk copy.

D. Release Owner Attestation

I confirm that this document records operational readiness only. It does not authorize runtime exposure without repo current authority/design gate.

Release owner signature:

Printed name:
