

06 - MK Final Pack Completion Certificate

Status: final-certificate template only. A completed certificate can be cited by a future gate, but it is not runtime authority by itself.

Country pack: North Macedonia / Makedonia (MK)

This is the final certificate for the MK Help Now content pack. It binds the signed evidence to a pack version/hash. It is still not runtime authority.

Pack version/hash:

Content freeze date:

Certificate date:

A. Required Documents

Document	Complete?	Evidence path / PDF filename	Signature present?
01 Reviewer Appointment And Scope	yes / no		yes / no
02 Source Verification Workbook	yes / no		yes / no
03 Content Sign-Off Matrix	yes / no		yes / no
04 Language And EAS Certificate	yes / no		yes / no
05 Operational Release Hold	yes / no		yes / no

B. Final Go / No-Go

Choose one:

- ☐ GO - signed MK pack is ready to be cited by a future current-authority gate.
- ☐ NO-GO - signed pack is not complete and must remain dark.

If NO-GO, blocking reason:

C. Required Caveats

Initial each true statement.

Initials	Statement
	This certificate does not authorize runtime exposure. Runtime exposure still requires current authority and design gate. Any changed content reopens the affected sign-off row. Any emergency/insurance/legal change triggers hotfix review. Unsigned languages or unsigned rows remain dark.

D. Signatures

Primary reviewer signature:

Printed name:

Date:

Counsel countersignature, if required:

Printed name:

Date:

Language reviewer signature:

Printed name:

Date:

Interdomestik release owner signature:
